

American Society of Ocularists 2020 Online Annual Conference November 13-17, 2020

Preliminary Education Program

as of August 25, 2020

- The 2020 Annual Conference website will preview on November 6th for 7 days and open to take courses and socialize with other attendees on November 13th. The Conference site will close at midnight (Pacific Standard Time) on Sunday, November 22nd. All educational courses and tested course exams must be concluded by the close of the conference site to receive credit.
- The education program has been approved by NEBO (tentatively, pending audit of courses) for 104 credits. Actual number of credits attained will depend on whether the exam is successfully completed for tested courses.
- There is no early special and no on-site registrations. Registration will close on Wednesday, November 11th, so that attendees may be provided with the proper access to the conference site. Your own personal access to the conference site will be sent to you via email, giving you access to all that your registration allows.
- Courses have been divided into three groups for those who do not want to take all courses and sign up for full registration.
- Course catalog and registration for Interns in the College of Ocularistry will be sent separately.

For additional information, see the FAQs provided or contact the ASO Office.
